Objective

I'm an aspiring MERN stack developer who loves building full-stack applications that make a difference in the real world. I'm motivated by writing clean code, improving performance, and creating scalable architecture. I'm looking for a chance to learn and contribute in a collaborative team that values innovation, user experience, and creating meaningful digital solutions.

Experience

YHills Edutech Pvt. Ltd., *Web Development Intern*

01/2025 – 06/2025

- Developed an Event Management System using the MERN stack.
- Implemented features like user authentication, event CRUD operations, and routing.
- Supported creation and management of 5 different event types with dynamic form handling and role-based access.
- Built responsive frontend UI components using React.js and Tailwind CSS.
- Gained hands-on experience with API integration and full-stack development workflow.
